

# TWIN FLUE SYSTEMS

## THE BENEFITS OF UNIQUE KESTON FLUE SYSTEMS MAKE EVERY INSTALLATION EASIER.

A low cost, small diameter (50mm) MuPVC pipe (Marley and Polypipe 2000 systems only) is the only item required for use with the innovative Keston flue and air intake system. This is readily available from your local merchant at a fraction of the cost of concentric flue.

The Keston flue system makes every job easier. To give you maximum flexibility, you can run the flue vertically or horizontally from an elevation of 1.5°, the flue can be extended up to 27\* metres from the boiler allowing for easy and hassle-free installation.

\*For flue fall and maximum total equivalent flue lengths please refer to the installation instructions

## THE SPECIFICATIONS

1. External flue trim

Profile view

2. Wall Sleeve to protect flue

Profile view

External flue trim neatens up appearance and allows for expansion of long flue runs

### Built in Britain

All Keston boilers are built in and designed for the British market

### Weather Compensator
