Jenna,

Re: submission of reserved matters relating to Development Zone B (Plot B6) within the Kings Cross OA

I am writing to conform that TfL has no observations to make with regards to the above development proposals.

Regards,
Rachel

17 July 2014

Dear Sir/Madam

Re: KINGS CROSS CENTRAL, BUILDING B6, YORK WAY, LONDON, N1C

Waste Comments

Water Comments

Thames Water recommend the following informative be attached to this planning permission. Thames Water will aim to provide customers with a minimum pressure of 10m head (approx 1 bar) and a flow rate of 9 litres/minute at the point where it leaves Thames Waters pipes. The developer should take account of this minimum pressure in the design of the proposed development.

No impact piling shall take place until a piling method statement (detailing the depth and type of piling to be undertaken and the methodology by which such piling will be carried out, including measures to prevent and minimise the potential for damage to subsurface water infrastructure, and the programme for the works) has been submitted to and approved in writing by the local planning authority in consultation with Thames Water. Any piling must be undertaken in accordance with the terms of the approved piling method statement. Reason: The proposed works will be in close proximity to underground water utility infrastructure. Piling has the potential to impact on local underground water utility infrastructure. The applicant is advised to contact Thames Water Developer Services on 0845 850 2777 to discuss the details of the piling method statement.

Supplementary Comments

Conditions concerning applications for King's Cross including condition 45 where granted in 2004. Thames Water have no further observations to make.

Yours faithfully
Development Planning Department
