application 2014/5413/P

To whom it may concern

I would like to refuse the planned works on 18-20 elsworthy road.

I live in the road opposite the apartments. I believe the works proposed will ruin the look of the street. I believe that elsworthy road is unique. The proposed plans will ruin it.

During the construction I believe it will be difficult to live in the street. The noise of trucks on a daily basis and demolishing of the existing building will not be a good place to live.

We as residents will have to bear noise and fume pollution for years.

I believe that the church will be affected by the construction, and the family style of the road will be ruined

I hope this email finds you

thanks

Hi

I would like to refuse the proposed work at 18-20 elsworthy road.
I'm a resident on the street.

I feel the owners of the building have not taken care of the building since I have lived in the area. So I would feel that any new project undertaken by these individuals will only lead to disaster. They have not painted the outside of the building since I have lived on the street. It is the worst house on the street.

I feel that they do not take care of it. So I would not trust them in starting such a big project on the street. As I feel they would cut corners to save money. The result would not be great.

Even though the state of the property is not great, I feel that it matches with the next door property so destroying to put something else in its place would not look good.

I would suggest renovating the outside and leaving the building as it is.

Also the noise levels and the work which will take place. I feel will reduce the value of the street.

Thanks
