Re: 2013/8158/P revised – FURTHER COMMENTS

Dear Tania,

Since the information relating to this application remains incomplete and you have confirmed you are awaiting further details it seems sensible not to comment until this is received.

Since on two occasions incomplete applications have been advertised and those wishing to comment have been frustrated thereby, there is a very strong case for re advertising this application when it is finally complete, since otherwise objectors can have no idea when the further information is received and it is unreasonable to expect them to continually monitor the Council's web site.

On a different matter: on 3rd April 2014 I sent you a report by Bickerdike Allen who having taken noise readings found that the installation as proposed by the applicant's consultants will not achieve the required noise reduction levels and is likely to cause serious noise disturbance. I asked to see a copy of Enviromental Health's comments on the Bickerdike Allen report. Is this now available please?

Best wishes, yours sincerely

Max Neufeld

X Tania I understand from Marc Dorfman that due to some real function - this e-mail did not reach you.
Hence with hard copy
