Subject: Planning Application by Telefonica (O2) for Upgrade to site of Gloucester Avenue NW1 7BH - Ref: 2014/5492/P

Nanayaa,

I understand that you are the officer allocated to the above application.

We had not anticipated any particular concerns relating to this site, as it is a very minor upgrade to an existing installation, but if you do require any further information, please let me know.

In the meantime, I note that you have received comments from the Primrose Hill Conservation Area Advisory Committee. I would like to respond to the points they have made as follows:

1. I appreciate that the very remote location of the site, on a thin area of land that is related purely to the railway, is a little difficult to convey, but hopefully the drawings illustrate what is planned (Drawing 201 shows the proposed site layout, while drawing 301 shows the proposed elevation)
2. The scheme is not within the grounds of Darwin Court. It is located exclusively on Network Rail land
3. As detailed within the application, the scheme has been certified as ICNIRP compliant, and thus there should be no issues of health that require any further consideration

4. The operators licence requires them to remove any redundant equipment (Electronic Communications Code 2003). This scheme is for additional equipment, to supplement the existing equipment in place.

Regards

Alan
