Dear Eimear,

The Brunswick Centre Re-paving Works

Discharge of Condition 5 (Materials) of Permission ref. 2013/3469/P

I write following our recent conversations regarding the paving materials to be used at The Brunswick pursuant to the recent planning permission (ref. 2013/3469/P) for new paving and drainage at the centre.

As outlined in our discussions, you may recall that a sample of paving from the suppliers Marshalls was provided to yourself and the Conservation Officer Catherine Bond during the course of the original application being determined. We appreciate you have recently moved offices and you may no longer have this sample so another is enclosed for information.

This sample was informally considered at the time of determination as being acceptable on the grounds that it is almost identical to the existing paving material at The Brunswick. A planning condition was nonetheless attached to the decision notice (condition 5) required details of materials to be submitted to officers for approval.

Unfortunately, it has been brought to my attention that we can no longer source the Marshalls material previously provided to you. However, I attach another sample from the supplier BBS Granites, which is identical to The Brunswick paving and the Marshalls paving previously provided to you.

To summarise, we consider there is no discernible difference between the sample we now propose and the one provided to you when the original application was being determined, both of which are almost identical to the existing paving at the centre. We therefore consider the material is entirely appropriate for The Brunswick and look forward to receiving your written confirmation of this as soon as possible. As discussed, a prompt response would be appreciated as we urgently need to place an order to purchase the stone in order that it can be delivered in time to carry out the works.

However, should you have any queries, please do not hesitate to contact me on the number provided above.

Yours faithfully

Sarah Roe
