

Dear Sir,

One of conifers at the back of my garden seems dead. The middle one in the photo. (Apologies for its poor quality but I hope you can see it) My gardener told me no point keeping it and suggested to fell it.

Can you please advise me if it is ok to instruct the gardener to do so or if there is some restriction on doing it.

I look forward to hearing from you soon.

Kind regards,
Harumi Ishigaki (Ms)
