Comments:

1. This tall & huge tree restricts the light.
2. I've been living over 5years, I've noticed the tree only pruned once that was May 2013. The pruning was very light, more likely thinning the tree.
3. I was very surprised that the tree of heaven is planted only 2metres away from the building corner in residential area. The tree of heaven is considered as a weed tree in Far East because its very invasive therefore its removed in residential area as soon as appeared.
