Importance: High

Categories: Purple Category

We are writing to give notice of proposed tree works in a conservation area as follows. These were briefly discussed with Nick Bell on his visit to site on 12 May.

Site Address: 14 Frognal Way, London NW3 6XE.

Tree: 1 no. Golden Indian Bean Tree *Catalpa bignonioides* 'Aurea' about 60 years old.

Location: NE corner of site as indicated on attached plan.

Proposed works: prune on N side to reduce overhang over road (a); remove branches overhanging garage gates (b); slight pruning on E side to produce a balanced outline from road; prune long branch on S (garden) side overhanging garage roof; and generally shape to a more fastigiate (upright) form. Letters a. and b. refer to attached photographs.

Reason for works: To reduce overhang over road and provide clear headroom over garage gates and ramp.

The tree can be seen from the road, and/or a site visit can be arranged by calling 020 7435 2162.

Regards

Douglas Maxwell
