Subject: Application Ref: 2014/4332/P

I wish to express my support for this Planning Application No: 2014/4332/P and the Associated Applications, Refs:- 2014/2149/PRE, 2013/7231/P, 2014/0320P.

I further urge LB Camden:

1. not to allow the works to be reduced so that they provide a lesser Standard of Protection than that which is given in this Planning Application.
2. to require that the works will not make the situation worse for communities living downstream of the Heath with regards to flooding and/or sewer surcharging for any level of storm event.
3. that once the works have been completed, the City of London can confirm that they have not made the situation worse. This should be independently verified.

Yours
Ian Creer
