Observations Regarding Planning Application 2014/3286/P

Re: Proposed Work:

Are proposed works allowed to commence without planning consent being approved?
I believe foundations are already being laid without your permission.

Re: Retrospective Installation of New Shop Front:

Please note: In the light of a previous consent to allow the shop to open until 2am. , no tables or chairs were allowed to be placed outside the shop.

Since Saturday 21st June 2014 I have noticed a table and four chairs directly outside the shop.

And since the shop is classified as a takeaway do the new owners require new planning consent for the table and chairs.

Is further planning permission required? Are toilet facilities required?

Re: Ground Floor Studio Flat:

The proposal for a studio flat at the rear of the takeaway will back on to the area that contains an extractor fan.

Is there adequate space from the proposed studio flat to the front door in case of a fire?

On a previous occasion, the current owners allowed the then tenants of the shop to live under the same area and in two sheds situated in the rear garden area.

Will there be adequate sound proofing from any resulting noise?
