2014/4849/P	Andrea Buscone	40 New Oxford Street	08/10/2014 12:45:54	OBJ	Dear All,  The proposed erection not only will obstruct view of the St George church to many flats in the courtyard comprising New Oxford Street, Museum Street and Coptic Street, but it will prevent light to all flats with windows facing the inner courtyard, which already suffers from light, especially for all neighbours located at lower floors. Moreover an office space with large windows will prevent privacy and disturb the peaceful enjoyment of our homes. Lastly, on the exterior, it will unbalance the level of the street structure, as currently all buildings have the same height. This will lead other adjacent buildings to erect further floors, thus a strong opposition to such erection. Kind Regards.
2014/4849/P	Andrea Buscone	40 New Oxford Street	08/10/2014 12:45:31	OBJ	
2014/4849/P	Francois Belot	40 New Oxford Street Flat 3	08/10/2014 08:03:11	OBJ	The erection of the new story would block the view I currently enjoy of the listed St Georges Church spire from my bedroom, at the back of my flat. I am also concerned about my terrace and flat being overlooked but workers during the day. Final concern is regarding the extent of building works, noise and dust.
