2014/5865/T	Kate Macfarlane	69 Arlington Road NW17ES	07/10/2014 20:36:07	OBJ	I write to object to the felling of the beautiful plane tree at the bottom of our garden. A nearby ash tree has been partially felled recently (without permission) and if the plane tree also goes it will reduce the important bio diversity of the area, which attracts many songbirds. i am quite happy for the plane tree to be topped to reduce its height. this was done before and it soon grows back
2014/5865/T	Antony White	69 Arlington Rd London NW1 7ES	02/10/2014 11:07:28	OBJ	I wish to object to the felling of this beautiful mature plane tree which separates our garden from the garden of 64 Albert St. This tree provides privacy for several houses by acting as a natural shield between the two terraces of houses on the west side of Arlington Rd and the east side of Albert St. It is one of a small number of mature trees in the leafy garden area between these two terraces and makes a significant contribution to the green and calm feeling of this area. The removal of this tree would reduce the aesthetic and amenity value of our garden. If you do not uphold my objection please could you consider allowing the tree to be topped rather than felled. This would limit the damage to the environment.

2014/5865/T	Eve White	69 Arlington Road	02/10/2014 13:51:34	OBJ	I would like to object to the felling of the plane tree at the end of the garden of 64 Albert Street, which is opposite my own garden. The tree provides a lot of privacy for us and our neighbours both on Arlington Road and Albert Street, and is a beautiful and green addition to the back gardens, many of which are currently under renovation and so just bare soil. If you feel that the height of the tree is too much, then taking a bit off the top would be preferable to chopping down the whole tree. I feel that chopping down the tree would detract from the peace and privacy of our garden.
