Subject RE: The Former Castle Public House - 147 Kentish Town Road - Application Validated

Dear Jennifer Walsh,

Thank you for inviting my comment. It looks good to me. It is nice that the extension is brickwork not render and is without the rendered quoins of the original building but I'm not a fan of the moulding around the windows or the glazing bars but that's a personal choice. It's a pity the ruin has to be restored as I would favour a proper brand new building (behind a replica facade if that's what the public demands). The sooner the site is redeveloped the better as it is an eyesore. What is proposed seems a good compromise in providing additional housing and space for an existing employer which Camden acknowledges are priorities with no loss of neighbouring amenity.

Yours sincerely,

Robert A Livock
