2014/6097/P	PIVARD	11 Glenilla Road Flat 3	27/10/2014 08:49:25	OBJ	Could you please provide more information about the project: - When do you plan to start the works? - For how long is it going to last? - What are your solutions to minimise the noise from plant equipment ? - Are you going to work on weekends? - At what time will you start in the morning and when will you stop in the afternoon? - Will you consider the other building works in the area (other basement extension in the street currently on-going just opposite 13 Glenilla Road, building works on Tudor close) - How many parking spaces will you block and for how long? - What will be the light impacts for the neighbours? My main concerns are the massive impact of noise in this residential area especially considering all the other projects currently ongoing in the area the loss of light for the neighbours. Moreover I realise this is very personal but I need to raise that I will go on maternity leave soon and will have no other choice but to be at home most of the day. I am really concerned by the level of noise of this kind of project and the negative it impact it will have on me and my future baby. Thanks for letting me know. 2014/6097/P	Stephen Davis	34 Belsize Ave London NW3 4AH	09/10/2014 10:29:56	OBJ	Firstly I believe it totally unacceptable that this application is being made circa a year after a major application was made and approved. We have suffered building works, noise and dirt for months, only for them to stop work in July, no doubt for the new application, but for the whole site to be left in a mess. This is totally unfair to the neighbours. The works to the rear dormer addition on the roof commenced months ago, clearly without permission. We are concerned about rights of light and the shadow from the rear roof dormer onto our property. Although there does not appear to be any alteration to the house wall, which forms the boundary with our garden, we are concerned that no alteration should be made. At these first floor level, a number of holes have been drilled and we are concerned as to the purpose of these holes and what additional alterations may be made to this wall.

2014/6097/P	Victoria Toyarsky	36 Belsize Avenue London NW3 4All	23/10/2014 00:17:30	OBJ	I object to the retrospective planning application that has been put in for a loft extension for 1 Glenilla Road. I do so for two reasons. First because the proposed loft extension in the roof is creating an additional floor on the building, above the existing attic floor. This pushes the side elevation above the roof line of the whole terrace changing not just the house but the whole terrace. No 1 Glenilla Road is the end of the terrace and so the extension is visible from many directions: from the street, from Belsize Avenue and from neighbouring properties. This is a conservation area and this will impact on the whole area if allowed to proceed. The second reason I object is due to the loss of privacy that this extension will bring, with its windows looking into the back rooms of my and my neighbours houses, where bedrooms and bathrooms are located.
