2014/6155/T	Elizabeth Specterman	26 Priory Terrace London NW6 4DH	22/10/2014 13:55:21	INT	I object strongly to the felling of mature trees at 143 Abbey Road NW6 4SL. I have lived in Priory Terrace for over 30 years with a huge oriental plane tree outside my living room window which has both caused subsidence to the property and blocked the light. Camden have refused to do more than prune the tree each year. If this application is approved it is completely out of line with Camdens Policy on Trees and clearly connected to a wish to take down trees for Camden's proposed new development.
2014/6155/T	Denis Bajolle	34 Priory Terrace London	24/10/2014 20:41:53	COMMNT	<p>They state that the trees are healthy and they want to cut them to enjoy the garden. That doesn't make sense to me since a garden is perfect for trees :). These trees only need to be pollarded and maintained (which they haven't done for at least 3 years).</p> <p>Currently the land is only used for storing rubbish and waste (including old electrical appliances with a skip on site - I am not sure that's legal) so my fear is that they only want the trees out of the way so they can expand their rubbish storage business or build on the cleared land. In addition, any new buildings or sheds on the site will have an adverse affect on our access to sunlight, as well as impinge on the privacy of our garden.</p> <p>We also have a rodent problem in our garden as well as our home associated with the 'junk' that has been stored on the site (mattresses, basins, bags of rubbish etc). Camden has sent an environmental officer out to investigate this. Any more rubbish will surely just increase this documented rodent (rats and mice) issue.</p>
2014/6155/T	Mary-Louise Bajolle	34 Priory Terrace London NW6 4DH	24/10/2014 20:44:31	COMNOT	
2014/6155/T	Mary-Louise	34 Priory Terrace London NW6 4DH	24/10/2014 21:18:58	COMNOT	In addition to my earlier comments regarding this application: the land on which the trees sit is within a designated Conservation Area. Surely all trees within a conservation area are afforded a level of protection in order to maintain the areas' designation as well as the 'charm' and appeal of a conservation area? The felling of these trees will start the slow erosion of an area that is losing its green and leafy appeal.
