The roof they are planning on using gives on to a courtyard, over which almost 100 flats overlook. We already have serious noise issues in this courtyard. The owners of this restaurant have been creating this eyesore for the past few months, happily leaving mess everywhere without consent. The roof is currently full of detritus, used as a dumping ground for all sorts of rubbish. It looks absolutely terrible, and is a nuisance for all residents around. Allowing them to use this roof / back garden for customers this would have a devastating effect on the quality of life of hundreds of people. Having to listen to their waiters who currently use the roof as hang out area is already bad enough. Common sense would not allow this to happen.</p>
