

Hi Barry

Thank you for your recent assistance re the eucalyptus tree that has got out of control in the garden of 2 windmill hill. I would like to take it out altogether as there is no way it could be trimmed nicely and a tree surgeon friend of mine recommended it be removed altogether. It is growing in every which way direction and is lifting the slabs pushing the wall out and my neighbour at no 3 has expressed concerns about the drains impact.

So i would like to organise for it to be taken out altogether please.

You have the photos and can see it has outgrown what it was probably put there to do and is blocking light in the apartments.

I look forward to your confirmation that this can be arranged.

Regards

Lynne
