2014/6438/P	Camilla	161c queens crescent Kentish town NW5 4EA	03/11/2014 23:07:30	OBJ	<p>I object to the increased height of this building. It should be exactly the same height as the neighbouring site to maintain continuity. It's bulky enough as it is. It will partially obscure the view I have of the London skyline as my flat faces side on to the site.</p> <p>The living wall would be a great goodwill gesture to the locals who's light and views will be downgraded.</p> <p>Please confirm no parking will be given to the new residents.</p>
2014/6438/P	Nargis Rahman	121 Weedington Road	01/11/2014 12:34:02	OBJ	<p>I would like to object to the new planning development at 47 Allcroft Road. I want to object on the grounds that the new building will block light not only into my garden, but also my home. Also, the building will invade the privacy of my garden. Furthermore, the living wall will not be built, although they promised to build it, so I will be face-to-face with a four storey brick wall, and the building will not be environmentally friendly. Finally, the new planning permissions will allow the building to be bigger than the rest of the surrounding houses, however, we weren't consulted, so I didn't even know about it until I received a letter about it, something which I'm not very pleased about.</p>
2014/6438/P	Gertrud Malmersjo	Flat 12 129 Weedington Rd NW5 4DX	02/11/2014 11:40:09	COMMNT	<p>I object to the increase of the height of the building by 600mm. This is a substantial increase to an already high building. The current proposed height is higher than most buildings in the street and will set a future precedent. It will represent a significant loss of light for me and will invalidate their previous sun/day light report. Considering the well being of others in terms of light and the heights of the buildings overall in the area, this is excessive.</p>
