

Dear Mr. Bell,

This northern section of Platts Lane has become seriously deforested. The woodland at Sarum Chase has been removed as a result of the attached consents to fell 41 trees (2005/3118/T, 2006/0371/T and 2006/2143/T) and the area has still not been returned to its former wooded state.

I was informed that the officer did not impose tree preservation orders because it was known that a large planting scheme was planned, and this is likely to have had a bearing on the officer's decision to grant permission for the felling of 41 trees, including: 7 Lombardy Poplars, 3 Scots Pines, an Oak and numerous other native species.

However, a condition of planning consent 2006/0422/P, requires **38 replacement trees** to be planted on completion of the project:

- 5 x Lombardy Poplar
- 11 x Silver Birch
- 10 x English Oak
- 9 x Sweet Chestnut
- 3 x Horse Chestnut.

This is a condition which must be met in order for the project to be signed off, but I am not aware that anyone from Camden has visited the site to ensure that this condition has been fulfilled.

The present application, 2014/6750/T to fell six conifers at the adjoining garden at 2 Telegraph Hill, would cause further harm and loss of biodiversity in this part of the Conservation Area. Conifer trees are extremely valuable as shelter for birds and this heavily polluted area can simply not afford to lose any more trees.

I am therefore registering my objection.

With kind regards,

Nancy Mayo
