I would also like to comment on the proposed changes to the parking bays. Camden Council must ensure that we lose no length in our parking bays and that changes be re-instated to the exact length removed. Parking is difficult due to the density of flats on our side of the road.

I am also concerned about how the proposed excavations will affect the third party mature Oak and that this development will mean the loss of the other mature Oak in the garden of no. 26 or other beautiful tree in the area. Notably, last year, another tree in the garden of no. 26 was cut down but not replaced as far as I am aware.

Finally no consideration has been given to where this project would be situated neither the privacy nor the amenity of number 24A Netherhall Gardens has been considered.
