

Estimate 1 Sliding Gate
34 Brookfield Park
18th September 2014

Sliding Gate

Supply and install one sliding gate to fit an entrance width of 2.6M and approximately 1.75 M high. The gate will be constructed from RHS section and be similar in design to the gate shown below.

The gate and support posts will come hot zinc sprayed and powder coated ~~Green~~ Black.

The drive is assumed to be level with no trees etc for the length of the gate in both open and closed positions.

Gate Operating System

Supply and install one sliding gate operator to the new gate.

In the event of a power failure the units can easily be put into manual operation via a simple release key.

Gate Locking Devices

The operators include a mechanical locking device.
