### 7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

*E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.*

T1 - fig, excessive growth, crowding, heavy shading, pollard back crown to 3" cut sizes, heavy cut back, but extremely vigorous, resilient tree species.

T2 & T3 - Rowans, reduce crowns by 25%, representing 1.5m from the height and sides trimmed in by 1m.

T4 - fig, remove due to irritation caused to residents on other side of the wall, reduce crowding in courtyard and prevent shading in lower level flats.

T5 - fig, remove due to irritation caused to residents on other side of the wall, reduce crowding in courtyard and prevent shading in lower level flats.
