I understand that this application relates to a private door opening onto a private roof garden + has no communal function. If this is the case I have no objection + am completely unaffected by it. I would advise safety glass. I did contact Building Regulations about glass doors in communal areas in this building following an horrendous accident sustained here by my 12 year old grandson with his falling through a communal glass door here in July. He underwent 2 1/2 hours plastic surgery as a result & I wished to know the ruling on safety glass in converted buildings, but I had no very satisfactory response despite several reminders to the council.
