I very strongly object to the above proposed planning application for extension to flat 1, 30 Redington Rd NW3 7RB. The reasons are many and I try to list most of them below:

- 1 - A line on the flat above flat 1 and the roof of this proposed side extension at ground level will come right up + will be level with a full length side glass door to my living room + a large window of my kitchen. This will surely endanger my security allowing burglars direct access to my flat. I am a single woman living on my own + I chose my home for its safety.
- 2 - Digging the foundation for the new extension in a narrow side path so close to the main house's foundation is a real threat to the foundation of our home + will cause movement, cracks + damage to the main building.
- 3 - while the building work + digging goes on a couple of meters away

Please continue on extra sheets if you wish

Please continue on the extra sheet.

from my flat, the horrific noise will make it impossible for me to live in my flat and go about the normal activities & will completely ruin my peace.

④ - while the building work goes on the builders, workers, burglars will have access via the roof of the side ext. & through the side door of my living room to my flat & this is a great threat to my security & shall produce a constant fear.

5 - The extension of the side of the building will completely ruin the beauty ^{the original} & design of our building and drastically change the view from the road or the back.

6 - the extension will increase the crowding of the building & have an impact on the common resources.

7 - A lot of old trees & shrubs will be uprooted and there will be damage to the natural environment. The flock of birds at present living here will be gone for good.

8 - My privacy with a roof - and possible tunnel - next to my living room looking into my life will completely be secured.

9 - Any extension to the building will require the consent of other (share)holders & we are all against this extension & will with all our resources.
