I support the application (please state reasons below)

I object to the application (please state reasons below)

Your comments

I was totally appalled by the idea of 6 houses you are planning to built at the bottom of the road leading to Meru Close - Site 1
I can not imagine there is a room there for 6 houses as part of the road belongs to Meru Close.

Apart from that we will be loosing nice green part of the estate and you can imagine that the houses squashed there will make the whole estate looking really ugly.

There are lots of people living in this area already and bringing more will be the most disrupting to the whole estate, more noise more rubbish which is already an issue there and as they have no possibilities to park their cars anywhere (difficult to believe that in a so called free country you are not allowing people to have a car parking space) they will no doubt try to use other people spaces eg Meru Close.
No matter how you control parking it could get out of hand and people who live there will have parking problems.

I understand there is housing shortage but it is also important to have some houses free green bits of estate and not build houses on any available land not matter how small.

I suspect that the decision about this unfortunate development was already taken and my comments do not mean much but I needed to have my say.

Elizabeth Kerr
