The organisation has already been in breach of noise regulations on the plants currently in situ. It was only under duress did they undertake Remedial works which have only partly resolved the problem.

The proposal is NOT a minor change but a significant ventageement with associated increase in noise pollution. Figures presented show little difference between day & night. There is acknowledgement that acoustic attenuation will be needed but I have no confidence this will be done, or if done to an acceptable level. As residents' we are exposed 24hr day to noise nuisance & with inadequate action by the organisations to resolve. This is NOT a mainly commercial area but has a significant resident population.
