

Method Statement and Materials Specification

49 Gloucester Crescent, London NW1 7EG

Supplied in connection with an application for listed building consent

November 2014

1.0 Materials Specification

- 1.1 The new gate is to be ledged and braced and of close boarded softwood timber construction with a paint finish.
- 1.2 The jambs will be of 75mm timber rebated to accommodate the gate thickness.
- 1.3 The vertical boards will be 125mm in width.
- 1.4 The thumb latch will be finished in black and affixed to the left hand side.
- 1.5 The hinges will be 450mm long straight hook & band type.

2.0 Method Statement

- 2.1 The new jambs will be cut to size and affixed to the existing brick piers using 7.5 x 120mm frame fixings.
 - 2.2 The new gate will be hung from the right hand side when facing the property from Gloucester Crescent, at a level which will accommodate for the change in ground level between the opening and the lower entrance step.
 - 2.3 The thumb latch will be affixed to the left hand side of the gate and the catch will be affixed to the jamb to suit.
-
