2014/6047/P	Rene Wilson	Maisonette 2nd And 3rd Floor 22 Camden High Street London NW1 0JH	27/11/2014 18:46:24	OBJ	<p>I am writing with regard to planning application 2014/6047/P (3 Kings Terrace London NW1 0JP). I have some very serious concerns with regard to this application.</p> <p>My concerns are as follows:</p> <ul style="list-style-type: none"> • In the design and access statement lodged it refers to number 5 Kings Terrace. Please note: <ul style="list-style-type: none"> o Many residents on Camden High Street including myself had major complaints with regard to 5 King's Terrace development. o However, these were raised only during/after construction, as the residents on Camden High Street were not informed. o Complaints for 5 King's Terrace ranged from <ul style="list-style-type: none"> ? Loss of light: <ul style="list-style-type: none"> • due to the height of the construction exceeding neighbouring buildings • different shape of roof which resulted in less sunlight ? Loss of privacy: <ul style="list-style-type: none"> • Windows look directly into bedrooms of some of the apartments on Camden High Street. ? Increase noise levels: <ul style="list-style-type: none"> • These buildings in King's terrace are in very close proximity to those on Camden High Street • Hence, the development at 5 King's Terrace, particularly the bi-folding doors resulted in severe noise levels. • The proposed section and roof layout, don't give indication of the height compared to neighbouring buildings. And based on the design and access statement I believe the intention is to go to similar height and windows to 5 King's Terrace. • This will have a dramatic impact to light and privacy. • 5 King's Terrace has already had a dramatic negative impact. However, some light gets in due to the neighbouring buildings being at a far lower level, with a roof shape that is more appropriate given the proximity of the buildings behind. • This planning application will be eliminate the last light that some apartments receive. <p>Based on above this planning application should be rejected, as it will have disastrous consequences to the light and privacy of the Camden High Street buildings residences. It will result in making some apartments on Camden High Street unliveable.</p> <p>I</p>
