2014/6789/P	James Kennedy	5 Torriano Cottages NW5 2TA	30/11/2014 16:23:08	INT	<p>We support the principle of this application because it will reduce energy demand while keeping the flats warm. However we are keen that the appearance of the building should fit in with its surroundings, both front and back.</p> <p>The CGI shows the colour of the proposed elevations A and B to be implausibly bright whereas we would expect the brick slips to match the existing brickwork.</p> <p>Our main concern is with elevation H which overlooks our back garden. Whilst we do not think it is essential for the walls to look like bricks, we are concerned that the colour of the new rendering should match as closely as possible that of traditional brickwork in the area.</p>
