Ref: Report 6713E

Dear Mr and Mrs Jain

**Environmental Noise Survey
272 Finchley Road, London, NW3 7AA**

Since writing and issuing the report 6713E dated 20th October 2014; you have informed us that there is a possibility that you may be able to gain access to a flat near to the complainant or the local authority may arrange access to the complainants flat itself.

When the original survey was carried out we were informed that there was not access to the complainants flat and therefore a location was chosen that was deemed representative of the overall acoustic environment. However, we would be happy to return to site and measure at a location closer to the complainant if the local authority feels that this would provide a more representative background measurement at the complainant's premises.

Unfortunately, we would not be able to attend site till January, and I'm aware that you need to submit the acoustic report today.

Please let me know if the local authority agrees to us returning in January and I will make arrangements to meet the Environmental Health Officer on site to discuss a new measurement position.

Kind Regards

Martin Hamer AMIOA
