The Council are being asked whether to change use of those parts of the building that have remained derelict for a few years now. I am encouraged that this space could be brought back into use as a restaurant, adding vibrancy to the very centre of Kentish Town. The fate of The Fruit Bowl in this location is one for the landlords rather than the Council to decide, but I will add that I've always thought it in an awkward place, blocking the footway at its busiest spot in an area of high pollution. Any move to the canopy area seems like an excellent solution.
