Informative(s):

- 1 Reasons for granting listed building consent:

The position, materials, finish and detailed design of the proposed new rooflights are considered to be appropriate. The position of the proposed satellite dish, to the rear below ridge level, will have a limited visual impact on the building's appearance, but this is not considered to be harmful to the building's special interest.

The proposed internal alterations are minor in nature and not considered harmful to this aspect of the building's special interest. The slim framed secondary glazing is appropriately designed, positioned and affixed. There will be no loss of significant or historic fabric involved in the proposal. The proposal is considered therefore to preserve the building's special architectural and historic interest.

The site's planning history was taken into account when coming to this decision. No representations were received as a result of consultation.

Special regard has been attached to the desirability of preserving the listed building and its features of special architectural or historic interest, under s.66 of the Listed Buildings and Conservation Areas Act 1990 as amended by the Enterprise and Regulatory Reform Act (ERR) 2013.

As such, the proposal is in general accordance with policy CS14 of the London Borough of Camden Local Development Framework Core Strategy, and policy DP25 of the London Borough of Camden Local Development Framework Development Policies. The proposed development also accords with policy 7.8 of the London Plan 2011, and paragraphs 14, 17 and 126-141 of the National

Planning Policy Framework.
