Figure 2: Location of selected viewpoints and sequential views

Single photographic views

View 1

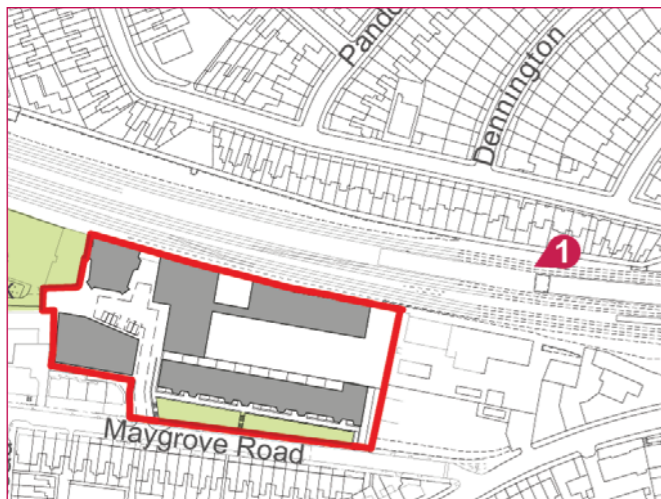

Local View from the footpath to the north of railway line

The proposed development will introduce new buildings into this view. The school buildings, the residential terrace and the commercial building are shown as being similar in scale to the existing buildings that front onto the railway line. The taller residential building will be visible as a new high quality marker for the development on the skyline. The sense of openness and the ability to experience longer views along this pedestrian route will not be undermined by the introduction of the new development.
