

View 8

Local view from Brassey Road, across Maygrove Peace park towards the Site

The proposed taller building will be visible in glimpsed views through the trees. The proposed employment building, which sits to the south of the taller residential building is obscured in this view by trees. The building would however become visible in the winter months once the leaves have been fully lost.

As the view demonstrates it will also be possible to view glimpsed views of the various developments currently under construction on Iverson Road, 187 and 199 West End Lane and 65-67 Maygrove Road.
