Sowing / Aftercare

Cast at 2 – 4 g/m2 on to contoured 75 – 150mm sky-garden biodiverse growing medium. Seeds are best sown in the Autumn or Spring, optimum seasons for sufficient warmth and moisture. Living roofs with good growing conditions will need annual maintenance for best results. This after-care will involve Spring weeding and Autumn strimming each year. Water substrate prior to sowing.

System description:

Sky Garden's UK provenance Biodiverse Wildflower Blanket, contains 38 native species (34 Wildflower and 4 Grasses) as a pre-grown vegetation cover for use on Extensive and Intensive green roofs, podiums and landscaping projects. The species have been carefully chosen to provide a long flowering season from Spring to late Autumn, with a varied range of colour and habitat which is attractive to pollinators and in aesthetic appearance. Sky Garden's Biodiverse Wildflower Seed Mix can be used to meet local and national Biodiversity Action Plans and BREEAM ecology credits.
