

Dear Sir/Madam,

I believe this shop front application must have already gone through, although it seems to be before the 21 days given for the consultation, the planned shopfront is already in situ.

I am objecting to:

1. The fact that this work has already been done within the consultation time.
2. There has been work, noisy work, being done at all times, before eight in the morning and late in the evening.
3. There has been no consultation period for the actual work being done within the premises.
4. The retail shop that was previously there is now being converted to a cafe, selling hot food and having a seating area.
5. All the above effects the residents of the flats above the said premises, i.e. the noise of the workmen, the noise of customers late at night, the smell of food and the rubbish which attracts vermin.

Finally I am complaining about the use of the basement in our residential block. The workmen are leaving a mess in our communal entrance, whilst coming in and out of our premises. I don't know what the basement is being used for but I object to the fact that all the phone lines to these flats are exposed and therefore can be easily damaged or tampered with. They should be boxed in and of course the tenants need easy access to these lines if there is a fault with their phone line.

I would be grateful for an answer to these objections and queries I have raised.

Regards

Alison Douglas, Flat 5, 188-189 Drury Lane, WC2B 5QD
