2014/1977/P	Jan Bockelmann	27 Prince of Wales Road London NW5 3LH	15/12/2014 11:59:01	OBJ	<p>Dear Sir or Madame,</p> <p>I understand that building work is now continuing after an initial phase had been stopped. I am very concerned about the basement extension. Work on the basement extension had already been conducted over the past summer; this lead to serious problems as the works had been stopped soon after. The foundations of the surrounding buildings seem to be affected and cracks on 27 PoWR are now even visible from the street and not just from within the property itself.</p> <p>I know that a number of concerns regarding the basement extension have been raised over the past year already. I do not get the impression that the concerns have been addressed in any way. To grant the permission for the basement extension seems also contrary to more recent trends restricting such extensions throughout London based on the considerable environmental impact such building works have.</p> <p>I would like you to reconsider the application and stop the excavation works before any more damage is done to neighbouring buildings and structures.</p> <p>Best regards.</p>
2014/1977/P	Michael Andrew	33 Prince of Wales Road NW5 3LH	15/12/2014 17:13:04	COMMNT	The excavation work being carried out at 29 Prince of Wales Road, are causing cracks to appear at 33 Prince of Wales Road. The drilling can be felt under the foundations. How long is this work due to continue please?
