2014/6928/P	Louise Kleboe	28 Redman House Portpool Lane London EC1N7UA	22/12/2014 11:47:32	COMNOT	I am assuming that this application to variation in the conditions is so that a building can be built in front of peoples windows therefore blocking light and air and transforming the place into an urban nightmare however the letter and the map is very unclear and it is difficult to understand exactly what the proposal is therefore I don't think this is a very democratic way of finding out residents views on this application. If it is the case that you want to build in front of existing windows and block light etc then I am strongly opposed to the removal of the condition and would be very unhappy if this application was granted. As a resident of Portpool Lane one of the most amazing things about the area is the light through the windows and tree lined streets so that even if your flat is small and overcrowded as mine is these important qualities make it bearable to live and we are able to cope with a small living space. Obscuring windows would make conditions and quality of life much, much worse for me and the other residents, also many people in the block have mental health conditions and a negative change that blocked light would significantly affect mental health issues such as depression and could even lead to suicides therefore I am vehemently opposed to the removal of condition 19. Peoples health and well being is important and should be placed above profit and greed. Please notify me of the committee date.
