**Subject:** ref trees to be cut down 2014/7624/t

to whom it may concern..

there is an application for two trees at 46 hillfield road nw6 1pz to be cut down to ground level  
I live at 108 mill lane ..  
these trees should not be cut down  
Camden needs to take a clear and firm view and show a true commitment to our environment when  
considering cutting down  
well established grand old trees such as these

mill lane is a busy road and we are fortunate to benefit from some beautiful fully grown trees along this  
stretch of the street  
all these trees are at the bottom end of the private gardens that form one side of mill lane  
these two trees form part of this "avenue of green" and it will make a huge impact to our street if they  
are taken down  
these trees are at least 60 /70 years old and should be valued for this alone  
they are important for our environment providing shade and shelter and habitat for birds and small  
mammals .  
the trees benefit the street and the surrounding homes by providing privacy  
offering a refreshing breath taking relief to our very urban environment  
they give psychological comfort  
the value of a fully grown tree cannot be quantified  
how can these trees ever be replaced in our life times ?  
please seriously consider the detrimental affect removing these two trees will have to our environment  
this is the time to be planting trees not cutting back long established fully grown beautiful trees which  
enrich our lives
