2014/7198/P	Jane O'Rourke and Andrew Hirsch	64 Parliament Hill Hampstead NW3 2TJ	13/12/2014 14:57:28	COMMEM AIL	I live next door (at no 64 Parliament Hill) to the proposed application. I strongly object to this application. My bedroom would be right next to the proposed terrace. I would envisage that any activity of our neighbours in the evenings when we are trying to sleep would seriously impede our quality of life. If future neighbours and guests chose to smoke on the terrace this would also have a serious impact on my young son who is an asthmatic and particularly susceptible to cigarette smoke. The terrace would also take away our privacy in our garden as we would be directly overlooked. As we are in a conservation area we have serious issues with the appearance of the proposed accommodation as the new windows and skylights in the roof extension will not be in keeping with the surrounding houses. It is our understanding that the size of windows cannot be changed in flats where there is multiple occupancy as the new sizes will not match the other properties in the same building.
