

Dear Sir/Madam,

We are writing in advance of this application 2014/7720/new being validated as we are traveling till 19/1/2015 and understand that we cannot make an objection until the application is validated. However, we were advised by your representative that we can notify Camden Planning that we will be putting in an objection as my neighbours and our family will be severely affected by this application proposal.

For your information only one of the applicants has also strongly suggested before submitting the application that we do not object against this application otherwise it will 'jeopardise' the application. We know that nobody can infringe on right to object to Camden and therefore are making our objection known to you.

We request that you acknowledge this email and our intention to object in case consultation window is missed for the above mentioned reasons.

Thank you in advance for your earliest reply.

Best wishes,

Maya and Natasha Aswani
