

4.a.1 Proposed Scheme  
4.1 Elevations, Sections, Views, & Site Plan

*Proposed Front Elevation:*  
The stepped, double pitched roof form responds to the shape of the site and allows light to the existing windows in the adjacent side elevations to 14 & 15.

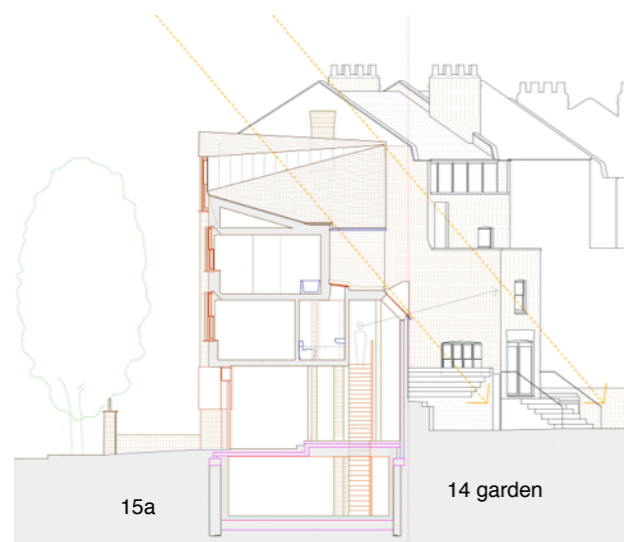

*Long Front Elevation:*  
The material and plane of the front elevation and the pitched roof profile provide contextual links to the larger terrace.

*Proposed Rear Elevation:*  
The sloping roof allows light to the side elevations of both 14 and 15 Parliament Hill

*Fenestration Diagram:*  
The structure of the window fenestration in relation to the common pattern in the conservation area.

*Proposed Section through Front Door:*  
The pitched roof and set backs allow light into the garden of 14a. The internal stair and light well configuration prevent overlooking.

*Proposed Cross Section through Light Well:*  
The light well and windows bring natural light into the basement level. They are set out to follow the pattern of the main elevation above.
