Dear ms/mr

I object to the planning of the above application. I agree also with the adjacent neighbours objection ( Jonathan root ) ( Aspries ) both neighbours of the development/ developers, I would add as a resident of no 23 that the development is contrary to planning directives in terms of density etc, I understand that works were undertaken without prior planning approval, and not for the first time by these developers.

I have a long lease that set out the amenity areas of which the whole yard would I believe be subject to, added to which a earlier planning decision for Ferdinand part of the yard to be built on, ( this was obtained illegally due to false photographs of my premises which you will have on record ) if this further application succeeds there will be further reduction of the yard to the extent that issues of health & safety will inevitable arise, apart from lorries that use the area ( health & safety in the workplace) there is the question of fire safety as a fire appliance cannot enter the yard. As there has been no personal attempt by the developers to address these matters I think it would be only right that you reject this application.

E Clarke 23 Ferdinand st NW1
