

2014/7241/P	2 Hillway	Loft conversion involving the installation of a side and rear dormer extension.	Carlos Martin
-------------	-----------	---	---------------

No Objection, Comment only

We have no objection to the addition of the rear & side dormers. No 4 Hillway, the other half of the semi-detached dwellings, has already had the attic converted (1996) and when completed this project would help balance the building.

The approved plans for #4 are no longer available from the Camden web site, however from the photographs it would appear that the ridge of the side dormer is not 500mm below the main ridge. Although contrary to CPG 1 this should be repeated on #2 so that as far as practical both side dormers are identical in appearance.

4 & 2 Hillway
