

Jamestown Road: Planning Condition 3

Billund 513 WS brick by Hoskins Brick Ltd with flush mortar to compliment the adjacent Interchange building

Planning Conditions concerning facing bricks

This submission concerns the facing bricks proposed for the development at 32 Jamestown Road (Application ref: 2013/8265/P) and deals with the partial discharge of the folloiwing planning conditions:

Planning condition 3:

Detailed drawings, or samples of materials as appropriate, in respect of the following, shall be submitted to and approved in writing by the local planning authority before the relevant part of the work is begun:

- b) details of all facing materials (to be submitted to the Local Planning Authority) and samples of those
- c) materials (to be provided on site)

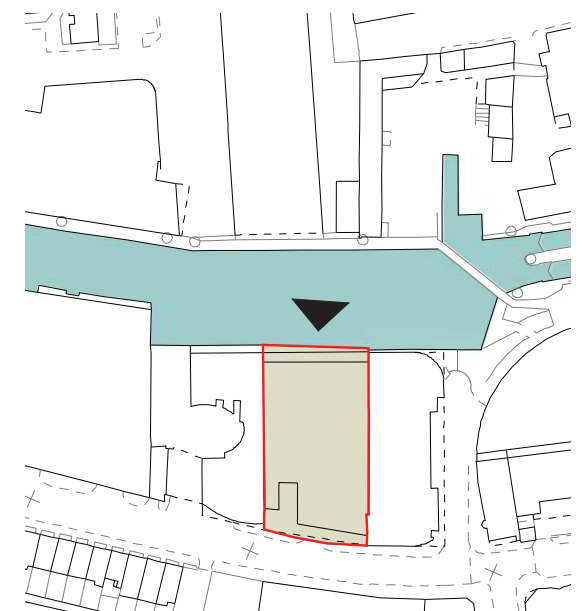

Proposed North Elevation

This submission deals with the facing bricks proposed for the scheme during previous correspondence and as reviewed with Camden Council during a meeting on site 18/11/2014 with the case and design officer for the scheme. Camden Council verbally supported the brick choice that was proposed for the scheme at this meeting and as a result, this is the facing brick that this submission seeks to formally discharge.

A robust, simple industrial palette of materials is proposed, inspired by the canalside location of Bewlay House. Brick is predominant, reflecting the industrial heritage of Britain's waterways, which is complemented by elegant steelwork, minimally framed glazing and finely finished concrete. The building elevation will be softened by planting at its upper level parapets.
