

2.3.1 AMENDMENT 11: CPL

Lift 06 extended to serve L02

In the currently permitted scheme, Lift 06 sits between CPL and CPH and serves retail unit R04 located on level 01 CPL. However, following consultation with potential retail tenants it was established that an extension of this lift, to also serve level 02 of CPL, would have a beneficial effect both on public disabled access between the floors, greater flexibility of use and improved functioning of the retail units, as each would now be served by two compliant passenger lifts.

This amendment offers the possibility of a shared access lobby at ground floor level, resulting in both a neater, more flexible access strategy and less visual clutter on approach. It would also allow the flexibility of a single reception area at ground floor and a greater opportunity for more areas of signage to be utilised.

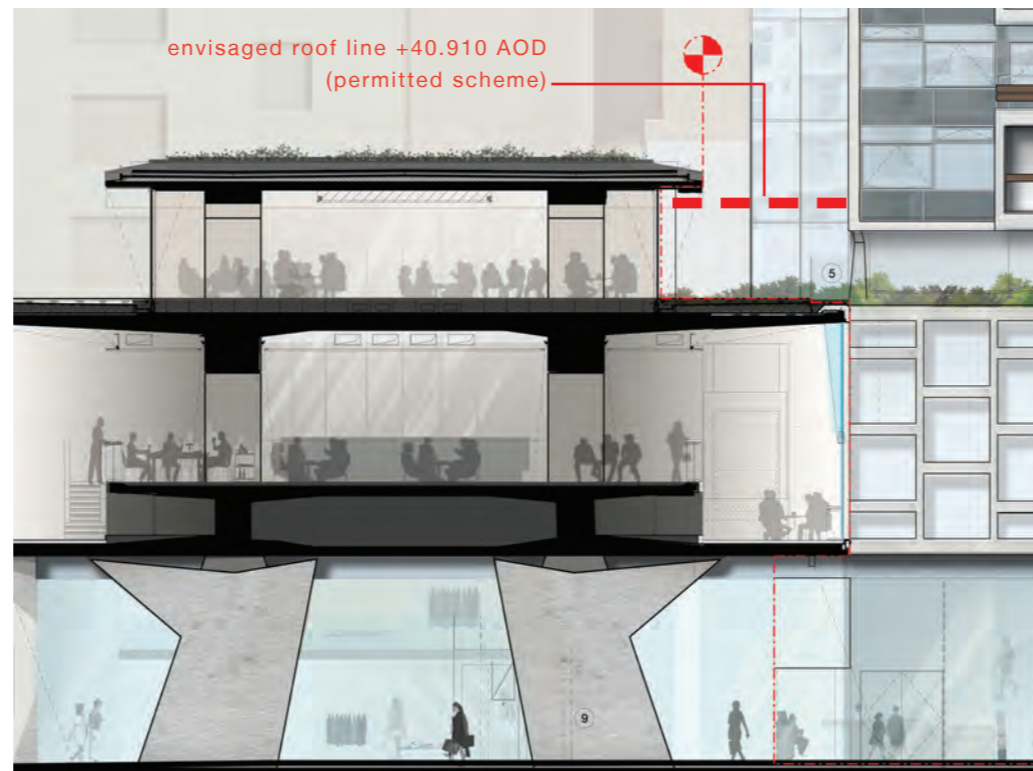

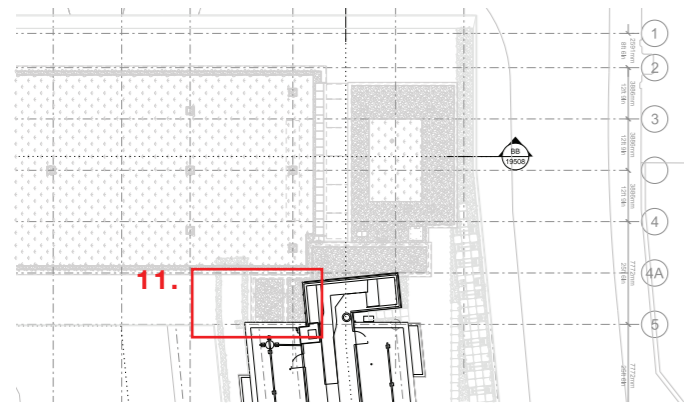

Externally, the lift overrun parapet would now extend to a datum of +42.820 which aligns with the adjacent parapet levels of lifts 07 and 08. This ensures a single distinct form with an uncluttered roof line. In order to further ensure a clearly defined separation from the CPL roof edge the lift enclosure has been set back at the upper levels on the north face.
