2014/7441/P	Jonathon Hudson-Evans	Walk Farm Cottage Chipping Norton OX75TG	07/01/2015 23:25:53	COMMEMP ER	It was with great interest I looked through this application. The design of straightening out the previous application to produce an open and ergonomic layout, using the materials of glass and natural materials will enhance the vision of the building in a truly complimentary manor given its Grade II listing. The intended garden room is both inventive (ergonomically and economically) and land-scapable (sic), being rectangular it parallels every wall/line and with its sedum roof will blend into the 'green area' almost immediately. This will enhance the ambience for both the residents/applicants and neighbours looking on. Knowing the architectural team who have worked on this design I know the quality of the finish will be of 'gold-award' quality and a design that everyone should be proud of. 7 January 2015
2014/7441/P	Charles Stevenson	13 Prince of Wales Terrace London W8 3PF	08/01/2015 10:13:05	COMMNT	I like the look of this extension. I feel more space of this nature should be allowed in the borough. I for one would welcome this design.
2014/7441/P	Charles Stevenson	13 Prince of Wales Terrace London W8 3PF	08/01/2015 10:13:27	COMMNT	
2014/7441/P	Charles Stevenson	13 Prince of Wales Terrace London W8 3PF	08/01/2015 10:13:28	COMMNT	
2014/7441/P	Rob Foote	4 THE GABLES CAVENDISH ROAD KY13 0JN KY13 0JN KY13 0JN	08/01/2015 10:23:16	COMMNT	What a vast improvement over the existing. A positive and imaginative solution.

2014/7441/P	Simon Astridge	14 Monnery Road Tufnell Park London N19 5AA	08/01/2015 08:08:50	COMMNT	We consider the proposals as respectful to the surrounding area and the existing building and should therefore be approved.
2014/7441/P	Butter Wakefield	2 Ashchurch Park Villas W12 9SP	07/01/2015 21:54:17	NOBJ	I have known the applicant Luke for many many years in his role as a first class architect. I feel certain that the build he is proposing will be full of integrity and beauty, it will most certainly be sympathetic to the local surrounds and in perfect harmony with the neighbouring homes. Please give him the permission he is seeking.
2014/7441/P	Nathan Abbey	66 Queen Gardens	08/01/2015 21:34:59	NOBJ	We feel the scheme is soft, in keeping, engages and balances the house and garden. the scheme is only an improvement to what is to be only a family home and provide a garden room for the children.
2014/7441/P	Ayat Hariri	Howards Coombe park Kt2 7jb	08/01/2015 06:48:15	COMMNT	the extension and garden room are sympathetic and architecturally elegant and refined. This will breath life and a fresh perspective into the street and help with its regeneration and the poor state of neighbouring properties.
2014/7441/P	Estelle Musso	6 regents park road	07/01/2015 20:56:00	SUPPRT	I have been a resident in camden for over twenty years and feel that this is a sympathetic and beautiful addition. There are numerous terrible extensions and alterations to neighbouring properties on Albert street and mornington terrace and this one will set a positive and green precedent. The garden room is intended for use for the family's children and will be heavily planted in the garden to make it even more discreet. It takes up the rear of the garden which is unused and the growth of the green roof will also ensure itt blends even further with the landscaping. I wholly support the application .
2014/7441/P	William Borrell	118 highgate rd	08/01/2015 09:05:33	COMMNT	This seems a great use of space and very tastefully done, why would anyone object to such a refined idea ?
2014/7441/P	Reece Hill	33 Swanley Crescent EN6 1NQ	08/01/2015 08:45:53	SUPPRT	I would like to express my thoughts on the garden room and rear extension at no.48 Mornington Terrace. I can see there has been a reduction in the extent of the rear extension, and that the height and scale of this work has been kept to a reasonable minimum. It is clear from the bespoke nature of the fenestration what has been designed and built has been well considered, and will be a positive feature of any over looking view there might be. Similarly with the garden room, which has been kept as low profile as possible and maintains a similar high degree of bespoke detailing. The inclusion of the green roofs should be applauded for all the good it will do local wild life and to reduce pressure on the city drainage system. This type of quality design and development should be encouraged. These works can only provide a net positive effect on the local area - this is the type of development to stop the tide of decay that otherwise happens from general neglect. I can only offer my complete support for the works as detailed.
