2014/7572/P	Robert Livock	34 Raglan Street	08/01/2015 10:22:05	SUPPRT	I support this application. Investment in the high street is welcome. The current windows are too small in relation to those in the floor above. The proposal corrects this. The application is not of sufficient importance to be considered by Committee.
2014/7572/P	Ceri Smith	65 Patshull Road nw5 2LE	07/01/2015 23:26:38	OBJEMAIL	<p>I object to the proposed alterations to the shop frontage at 180 Kentish Town Road. The proposed design purports to be a reinstatement of a frontage closer to the original, but is unsympathetic to the rest of the building, and does not reflect the applicant's own photograph of the building before alterations were made. In particular, I object to the floor to ceiling glass windows and glass door. If Foxtons are to make changes they should be ensuring that the changes retain the architectural context of a public house.</p> <p>I hope that if this is recommended by officers it will be discussed by members at committee. I would like to be notified of the data of any committee discussion.</p>
2014/7572/P	Elizabeth Sheridan	100 highgate road	08/01/2015 00:25:48	COMMNT	I do not support this. it will significantly alter the appearance and character of a fine old pub and the area in which it is located. It will instead have the brash and ugly look of the camden foxtons which is illuminated day and night in lurid ever-changing hues. It will be an unmissable eyesore. it is not in keeping with the historic appearance of Kentish town and associated conservation areas. Can't it be converted into something more low key and useful to residents of the area instead? eg a restaurant / another pub or if it must be an estate agents, to keep the current facade with minimal alterations? If not it will seriously lower the tone of the neighbourhood. I oppose this application.
2014/7572/P	Alaric Mostyn	93 Patshull Road	08/01/2015 10:54:02	OBJ	I strongly object to the proposal to install fall-to-ceiling glazing. This is another step in destroying the character of the High Street - and is especially important for an iconic corner site. There are already too many corner buildings that have had floor-to-ceiling glazing put in eg the corner of Prince of Wales Road (Olivers) and Kelly Street (Rochester Place). If there are any changes to this facade it should only be in the direction of restoring to the original character.
