Windows/ Rooflights/ Screens/ Louvres

L10 Windows/ Rooflights/ Screens/ Louvres

To be read with Preliminaries/ General conditions.

GENERAL

110 EVIDENCE OF PERFORMANCE

- Certification: Provide independently certified evidence that all incorporated components comply with specified performance requirements.

115 TIMBER PROCUREMENT

- Timber (including timber for wood based products): Obtained from well managed forests and/ or plantations in accordance with:
 - The laws governing forest management in the producer country or countries.
 - International agreements such as the Convention on International Trade in Endangered Species of wild fauna and flora (CITES).
- Documentation: Provide either:
 - Documentary evidence (which has been or can be independently verified) regarding the provenance of all timber supplied.
 - Evidence that suppliers have adopted and are implementing a formal environmental purchasing policy for timber and wood based products.

120 SITE DIMENSIONS

- Procedure: Before starting work on designated items take site dimensions, record on shop drawings and use to ensure accurate fabrication.
- Designated items: all windows.

140A CONTROL SAMPLES

i) Tender Samples

- Submit with the tender sufficient samples of the following showing the Contractors selected systems included within the Tender
- A 'L' corner sample of each system 300mm x 300mm length including cappings, pressure plates, gaskets, including glazing finished in the specified system and colour.

ii) Control Samples (Post Contract pre-Procurement)

Submit for comment prior to order/procurement a sample of the following:

- 300mm length of each type of framing including cappings and pressure plates, glazing bars and cills.
- All proposed gasket types, extrusions, moulds, etc. in materials and colour specified. All samples shall include at least one joint.
- Glass samples 600mm x 600mm of all specified glass types.
- All fixings.
- Proposed types of finish.
- Ironmongery.
- Sliding operating mechanisms, track and wheels including automatic chain actuators.
- Switches and controls.

iii) Trial assemblies (Ahead to fabrication of remaining areas)

Construct independently from the site works the following:

- a typical bay of the curtain wall glazing system L10.316 & L10.317

iv) Benchmark Control Samples

Provide on site as part of the works, as part of the first completed bay of construction, samples for inspection for all cladding types specified within this Works specification Obtain comments from the Architect and contract Administrator before proceeding with the remaining works. Submit as required until the works is in accordance with the Contract, and Contractors Final detailed design drawings.
